

VacAway®

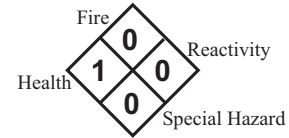

Cyclone-HWE

Soil Filtration Line Remover and All-Purpose Spotter

Hazard Rating (HMIS/NFPA)

Key: 0- minimal 1- Slight 2- Moderate 3- Serious 4- Severe

Description

Cyclone-HWE is completely free of solvents yet it is easily the best butyl-free Soil Filtration Line and general spot remover on the market. Its highly sophisticated formula removes black filtration lines from carpet edges, under doors, along stairs, around heating/air conditioning vents, etc.

Other types of spots and stains Cyclone will easily remove include ink, toner, grease, tar, lipstick, mascara, etc.

Directions

In an inconspicuous area, test all carpeting or fabric for color fastness before applying Cyclone or any cleaning product.

Moisten stained areas with Cyclone, agitate and extract with HWE or use an absorbent cloth or towel and blot until excess stain is removed. Ten to fifteen minutes dwell time will help, but Cyclone is so powerful, it is usually unnecessary.

If necessary repeat above procedure.

Note: Depending on time of year and age, this product may vary in color from nearly clear to a deep Red/Maroon... Its color will not affect the performance.

See product label and MSDS for additional information and instructions.

TIP: When removing ink with Cyclone, if a bluish or blackish tinge remains apply VacAway **Red Vanish** to remove.

Benefits

- ▶Solvent Free... No harmful chemicals.
- ▶Removes spots and stains safely and effectively.
- ▶Minimal spreading when removing ink.
- ▶Pleasant cherry fragrance.

Dilution Ratios and Other Info

Use undiluted for most spots, but can be diluted 1:2 with water for general spotting.
PH.....7.9 (undiluted)
Stability..... Freeze-Thaw Stable
Packaging.....Pints, Quarts and Gallon bottles (4 per case)
