LPH is a Low pH Crystallizing Shampoo specifically designed to clean Oriental Rugs or Upholstery which have a potential for bleeding.

Description

LPH is a low pH blend of essentially non-hazardous detergents, emulsifiers and a unique co-polymer. This amplified formula attacks and eliminates sticky, dirt attracting soil whether used on location or in plant. LPH handles sensitive dyes safely on all carpet fibers. It crystallizes upon drying and if not completely removed during the rinse, it is easily removed with routine vacuuming.

Applications

This Low pH Crystallizing Shampoo is specifically designed to clean Oriental Rugs, Specialty Textiles and Upholstery which have a potential for bleeding. The pH is 5.5 - 6.5 when mixed according to direction. This product can be used with your rotary, rotary extraction, or dry foam equipment, and you can use it on location or for your in-plant operation.

Secondary	X			

Directions

Vacuum thoroughly to remove dry particulate soil. Test for color fastness before applying any cleaning product to carpets, rugs, or textiles. Mix product according to directions using dilution ratios listed below.

Depending on type of application and soil load, apply at the rate of 200 to 400 Sq Ft per gallon of RTU solution. Can be applied with gravity feed systems such as a rotary machine with an attached shampoo tank. Can also be applied with pump-up or electric sprayers.

Apply the solution (10 to 15 minute dwell time is recommended). Use your method of choice to rinse, extract, or absorb the solution along with the dissolved soil.... If this product isn't completely removed during the cleaning process it will crystallize and be removed with the next routine vacuuming.

See product label and MSDS for additional information and instructions.

TIP: Mix this product 1 to 1 with water and place in a quart pistol-grip sprayer to make an excellent "Super Spotter". Carry the sprayer with you and use when you encounter a particularly tough spot/stain. If there are any spots or stains that aren't removed completely with this product, treat them with the appropriate VacAway spotting agents such as Cyclone, Red Vanish, P.O.G. or Rust Assassin.

Benefits

- Will not attract soil
- Helps eliminate wick-back.
- Easily vacuums away upon drying.
- Light pleasant fragrance at use dilution.
- Mix with hot or cold water.
- Safe and cost effective.

Dilution Ratios and Other Info

Light to moderate soil.....1:16 (8oz per gallon)
 Heavy soiling.....1:8 (16oz per gallon)
 PH.....5.5 - 6.5 (8oz per gallon)
 Stability..... Freeze-Thaw Stable
 Packaging.....1 gal bottles (4 per case)
