ENCAPSULATING CARPET DETERGENT AND DEODERIZER

Encapsulates Dirt - Knocks Out Odor

Description

WHAMM is a revolutionary, one of a kind product! It is a proprietary blend of essentially non-hazardous detergents, emulsifiers, deodorizers and a crystallizing co-polymer. It's unique formula attacks both dirt and mal-odor in a one step process. WHAMM also helps to eliminate sticky residue left from soda spills and previously applied cleaning products. It is designed to encapsulate large amounts of soil, destroy most mal-odor, and dry to tiny crystals. These crystals become the vehicles for soil removal during routine post-vacuuming and will appear in the vacuum bag as a silty/powdery form.

Applications

May be used on all colorfast synthetic carpet including nylon, polypropylene & polyester. May be used on commercial, residential, looped, cut pile, cut & loop, plush, etc.

	Commercial	Residential	Upholstery	Shower Feed Systems	Pad or Bonnet Pre-spray	HWE TLC
Primary		X			X	
Secondary	X		X	X		X

Directions

Vacuum carpet thoroughly to remove dry particulate soil. Test all carpeting for color fastness before applying any carpet cleaning product. Mix product according to directions using dilution ratios listed below.

Depending on type of application and soil load, apply at the rate of 200 to 400 Sq Ft per gallon of RTU solution. Best applied with a pump-up or electric sprayer, but can be applied with a gravity-fed systems such as a rotary machine with an attached shampoo tank. For odor removal give 10 to 30 minutes dwell time. If available, agitate the solution into the carpet pile with a high agitation machine such as a rotary, cimex, or counter rotation brush machine...Else brush or rake solution thoroughly into the carpet fibers.

WHAMM can be used as a straight encapsulation product without any rinsing or extraction, but is best used as a pad, bonnet, hot water extraction or upholstery prespray. For extreme soiling and oily situations, it can be boosted with VacAway Z-Bomb... Simply add one part Z-Bomb to 2 parts WHAMM. Z-Bomb will give it a significant cleaning boost, but will not greatly diminish the crystallization when mixed this way.

For cat urine or other severe odor, first treat the area with VacAway PeeRadicator. WHAMM is synergistic with PeeRadicator and can be a great aid in removing odor when used immediately after and in conjunction with it. Using the two products in this way is like giving odor a "One-Two Punch".

See product label and MSDS for additional information and instructions.

TIP: Mix 32oz of this product in a quart pistol-grip sprayer to make an excellent "Super Spotter", deodorizer and anti-wicking agent. Carry the sprayer with you and use when you encounter a particularly tough spot/Stain. After cleaning soda spills or areas where, odor or wick-back are a concern, simply lightly mist with WHAMM and brush in as a last step... This procedure can greatly reduce/ eliminate many problems.

Benefits

- Will not attract soil
- Helps eliminate wick-back.
- Easily vacuums away upon drying.
- Light pleasant fragrance.
- Mix with hot or cold water.
- Safe and cost effective.
- Carpets stay cleaner longer.
- One step cleaning and deodorization.

Dilution Ratios and Other Info

Light to moderate soil..... (8oz per gallon)
 Heavy soiling.....(12 - 16 oz per gallon)
 PH.....(8.0 - 9.0 at dilution)
 Stability..... Freeze-Thaw Stable
 Packaging.....1 gal bottles (4 per case)
