

## **INCREASE IN PRICE OF HEL-GEL**

Due to the recent shortage and high demand for d'Limonene, VacAway, as well as other manufacturers are being forced to increase prices on any d'Limonene based product; Hel-Gel ORANGE contains approx 50% d'Limonene and thus the increase in price.

Poor weather conditions in both Brazil and Florida, two of the world's largest producers of oranges, have caused delays in cultivation and the orange crop is expected to be significantly less than it has been in the recent years. The cost of oranges is increasing due to this shortage and the price on d'Limonene is following suit. The price of d'Limonene has more than doubled and we do not know exactly when the price will come back down, if ever. If the price of d'Limonene drops we will adjust our price of Hel-Gel downward accordingly.
